EVAPORATOR WICKING SOCK

A blend of synthetics is key to keeping feet dry, and warm. The light weight Evaporator sock wicks moisture (sweat) away from your body and is perfect for aggressive and active riders.

- High-performance multi-panel sock engineered to wick away moisture
- Above calf moisture absorbing light weight sock for warmer temps
- Cuff and ankle stretch bands to help hold sock in place
- Nylon reinforced bottom foot
- Padded bottom foot, toes, and shin for added comfort in snowmobile boot

EVAPORATOR SOCK

BLUE/ BLACK

INSULATOR HEAVY-WEIGHT SOCK

The Insulator sock provides extra warmth for extremely cold environments. Its special blend of synthetics keeps feet dry and warm on those long, cold trail-riding days.

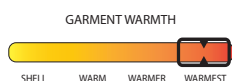

- Above calf moisture absorbing heavier weight sock for colder temps and those needing maximum warmth
- Cuff and ankle stretch bands to help hold sock in place
- Nylon reinforced bottom foot
- Full high loft terry knit construction for maximum warmth and added comfort in boot

BASE LAYERS

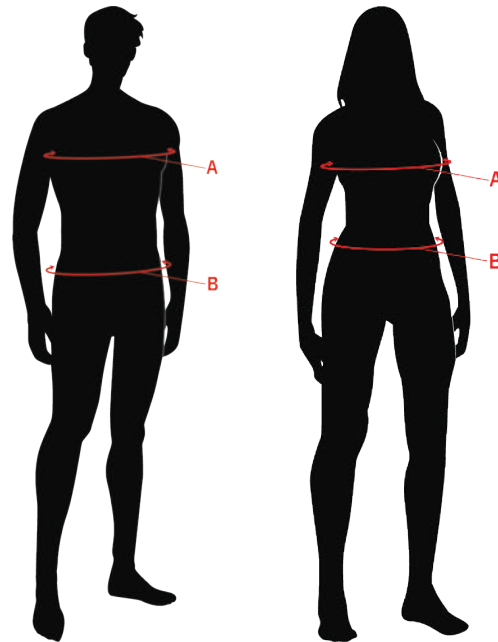

HOW OUR SYSTEM WORKS

A proper Layering System is the key to staying warm and dry while riding. Choosing the right layering garments is the first step towards this goal. Cotton based products are absolutely not part of a Layering System. This includes sweatshirts and denim products; great for fall and street riding, not for snow.

During the activity of snowmobiling you generate moisture (sweat). The harder you ride, the more moisture you generate. Cotton products trap this moisture, which in turn, transmits cold directly to your body. Thus, our layering system is aimed at keeping riders warm and dry to allow time for more fun, not cold.

MEN'S EVAPORATOR WICKING BASE LAYER

An effective layering system starts with a base layer which wicks moisture (sweat) away from your body. This base layer must be worn directly against the skin. Our Evaporator gear, made from a wicking quick-dry material, is the recommended base layer for the Arctiva layering system.

- Light-weight, extremely breathable, polyester
- Quick drying fabric removes moisture away from skin to keep you dry and comfortable
- Crew neck on jersey, Soft elastic waistband on pant and simple slim hem design for comfort
- Flat lock stitched seams for added seam strength and comfort
- Performance fit

MEN'S REGULATOR MID-WEIGHT BASE LAYER

The second layer in the Arctiva layering system is the Regulator. Made from a unique blend of polyester/spandex yarns resulting in an incredibly soft feel. When paired with the Evaporator base layer, riders have an ideal fit for moderate to cold temperatures.

- Mid-weight, highly breathable, polyester
- Polyester/spandex blended fabric removes moisture away from skin to keep you dry and comfortable
- 4-way stretch fabric for ultimate comfort and range of movement
- Crew neck and simple slim sleeve hem design for comfort
- Flat lock stitched seams for added seam strength and comfort
- Performance fit

WOMEN'S REGULATOR MID-WEIGHT BASE LAYER

The Women's Regulator is the primary base layer for next-to-skin comfort, warmth, and moisture management. When temps are really low, combine with the Men's Evaporator wicking base layer and the Insulator heavy-weight sock for extra warmth and all day comfort.

- Mid-weight, highly breathable, polyester
- Polyester/spandex blended fabric removes moisture away from skin to keep you dry and comfortable
- 4-way stretch fabric for ultimate comfort and range of movement
- Crew neck and simple slim sleeve hem design for comfort
- Flat lock stitched seams for added seam strength and comfort
- Performance fit
