VICTORY

A New Parts Unlimited And Drag Specialties Catalog

is something special, even more so when it is made in support of two growing U.S. motorcycle brands.

Victory and Indian are distinct American-made V-Twin motorcycles that give a fresh, exciting experience. And we are proud to highlight the parts and accessories available for these bikes with this, our first-ever Victory/Indian catalog.

Victory Motorcycles were first produced in 1998. At that time, it was a bold move since it isn't very often an all-new motorcycle manufacturer appears on the American scene and makes such an impact. The machines, which are produced in Spirit Lake, Iowa, have made their mark in the V-Twin custom world. Their bold styling and strong performance have earned Victory a very loyal rider following.

V & INDIAN

Indian Motorcycles are one of the most revered brands in history, dating back to 1901. From the 1920s to the 1950s they were one of the biggest U.S. motorcycle manufacturers in existence. Then the brand went on hiatus for more than 60 years. It was a quiet time period for Indian. But all that changed in 2013 when the re-born Indian Motorcycle re-established the prestige of the brand with a new, exciting line of motorcycles that has been well-received by enthusiasts. Indian is back, and the future looks bright for this legendary name in motorcycling.

We Are Proud to offer this all-new Victory/Indian catalog to our dealers and customers in support of these exciting brands. We will be continuing to add parts and accessories for Victory and Indian motorcycles, so grab our 2015 Street catalog when it arrives.

IMPORTANT INFORMATION RELATING TO EMISSION CONTROL REGULATIONS:

DISCLAIMER: There is no warranty on exhaust pipes and mufflers with regard to any discoloration. Discoloration (blueing) is caused by tuning characteristics, i.e. cam timing, carburetor, etc., and is not caused by defective manufacturing. See the Chemicals and Lubes section for products that will help prevent or remove blueing.

DISCLAIMER: Emission-related parts for OEM non-emission control system equipped motorcycles as well as slip-on mufflers that mount downstream of and which do not alter the performance of OEM emission-related devices are considered legal replacement parts by the California Air Resources Board (CARB). CARB does not, however, permit the use of aftermarket emission-related parts that remove or alter OEM emission control devices unless certified by CARB, other than for closed circuit race use only. More California exhaust information is available at www.arb.ca.gov/.

DISCLAIMER: Aftermarket products, including but not limited to fuel/air controllers which alter, modify, or replace emission control devices or systems of an originally compliant highway motorcycle, are not legal for street use in California unless they

have been issued a CARB Executive Order. Aftermarket emissions related products which have not been issued an Executive Order or which are not aftermarket Replacement Parts, as defined in Title 13, California Code of Regulations, Section 1900(b)(2), are authorized for closed circuit race use only. See manufacturer's information and state and local laws to determine what is authorized for your use on your vehicle.

DISCLAIMER: Products shown may be designed, manufactured, intended and sold for closed circuit race use only and use of the same on public roads or lands may be a violation of local, state and/or federal laws.

DISCLAIMER: Products shown may not conform to federal, state or local noise regulations.

DISCLAIMER: Check your applicable laws and manufacturer's publication(s) and/or website(s) for manufacturer's warranty, maintenance, safety, mounting and any regulatory compliance/non-compliance information.

SCORPIO

SR-i900R RFID MOTORCYCLE SECURITY SYSTEM

- The SR-i900R is a latest-generation two-way FM security system offering hands-free RFID technology
- Simply walk towards or away from your bike, and the remote transceiver will automatically communicate an arm or disarm command using its proximity recognition system
- This unique auto-arm and hands-free disarm operation provides the highest standard of security and convenience
- Standard features include:
 - RF-ID for hands-free operation
 - Programmable auto or manual arming and disarming
 - Long-range FM transceiver (up to a 1/2 mile)
 - Range and signal status display
 - Compact design (3 1/16" x 2 3/4" x 7/8")
 - Dual-axis accelerometer for detecting impact/inclination
 - Built-in 120 dB multi-tone siren with soft chirp
 - Sensor violation display
 - Audible/vibrating alert
- Remote motorcycle finder/panic alarm
- Programmable perimeter sensor with warn away that detects motion around the bike, protecting saddlebags, luggage and accessories
- Built-in battery backup system allows the pager to operate even if wires are cut or circumvented
- Ignition disable feature allows the user to remotely cut off the engine in case of hijack
- Includes charging cord for remote receiver
- Factory connector kits allow the alarm system to be integrated into the OEM-style harness without any cutting or splicing (sold separately, see page 15)

NOTE: Includes module, mounting kit and hardwire kit (not shown).

SUG. RETAIL **\$439.95**

PART #

4020-0052

SR-i900 RFID/TWO-WAY FM SECURITY SYSTEM

- SR-i900 provides the convenience of hands-free operation combined with a compact two-way FM paging security system designed specifically for the motorcycle industry
- Standard features include two-way FM remote transceiver
- RFID for hands-free operation
- Auto or manual arming and disarming
- Ignition circuit sensor
- Long-range FM transceiver (up to a 1/2 mile)
- Range and signal status display
- Compact design (3 1/16" x 2 3/4" x 7/8")
- Dual-axis accelerometer for detecting impact/inclination
- Built-in 120 dB multi-tone siren with soft chirp
- Sensor violation display
- Audible/vibrating alert
- Smart Battery Safeguard with sleep mode
- Motorcycle battery voltage display
- Remote motorcycle finder/panic alarm
- Includes charging cord for remote receiver
- Optional programmable multi-stage perimeter sensor detects motion around the motorcycle (sold separately PART #SN-4)
- Optional ignition disable/anti-hijack allows disabling of the motorcycle's electrical system and prevents "hot wiring" (sold separately PART #4020-0007)
- Optional Factory Connector Kits: The SR-i900 system is universal and will install on any motorcycle; optional OEM-compatible factory connector kits are model-specific and plug directly into the factory harness making installation fast, clean and easy (sold separately, see page 15)

SUG. RETAIL **\$329.95**

PART #

4020-0077

SCORPIO

SR-i800S RFID MOTORCYCLE SECURITY SYSTEM

- Easy-to-use system provides the convenience of hands-free operation and the security of shock, tilt and ignition sensors
- RFID hands-free technology eliminates reaching for the remote to protect the motorcycle
- Standard features include single-button, waterproof remote transceiver
- RFID for hands-free operation
- Auto or manual arming and disarming
- Soft chirp arming
- Flashing lights with trigger memory display
- Ignition circuit sensor
- Compact design (3¹¹/₁₆" x 2³/₄" x 7⁷/₈")
- Dual-axis accelerometer for detecting impact/inclination
- Built-in 120 dB multi-tone siren with soft chirp
- Sensor violation display
- Smart Battery Safeguard with sleep mode
- Remote motorcycle finder/panic alarm
- Built-in battery backup system allows the siren to operate even if wires are cut or circumvented
- Optional programmable multi-stage perimeter sensor detects motion around the motorcycle (sold separately PART #SN-4)
- Optional ignition disable allows disabling of the motorcycle's electrical system and prevents "hot wiring" (sold separately PART #4020-0007)
- Optional Factory Connector Kits: The SR-i800S is universal and will install on any motorcycle; optional OEM-compatible factory connector kits are model-specific and plug directly into the factory harness making installation fast, clean and easy (sold separately; see below)

- A revolutionary concept, the windshield is out of your line of sight, but the air goes over your head, with no buffeting
- Adjustable and available in three height ranges; 13"-16", 15"-18" and 17"-20"
- Contoured concave Venturi Wing™ boosts the air flow up additional 3", through the full range of adjustment
- Wings can be installed in three positions, each with 11/4" of no-tool adjustment, find the sweet spot for cruising down the highway, or "drop top" around town
- Dynamic styling, available in Ghost or Black Smoke with polished or "Night Shades" black stainless straps
- Engineered using CFD (Computational Fluid Dynamics) software
- Available in 9" headlight cutout
- Mounting hardware must be ordered separately; see page 18
- Made in the U.S.A.

DROP TOP MEMPHIS FATS WINDSHIELD SIZING PROCEDURE

- Using a Memphis Shades sizing guide held about "one finger" above the headlight, slanted back about the same angle of the forks, sight level through the sizing guide to the tip of the rider's nose
- The closest height shown on the sizing guide is the rider's normal windshield height
- For Drop Top sizing, subtract 2" from the rider's normal windshield height and find the Drop Top range into which the shorter height fits (For example, if you measure 19" on the sizing guide, subtract 2" to get 17"; your Drop Top Memphis Fats size is 15"-18")

NORMAL WINDSHIELD HEIGHT

MEMPHIS SLIM

- Slimmed-down version of Memphis Fats
- Gradient translucent colors, as well as clear and solar (a light tint with 72% visible light transmission)
- Measures 18" wide; available in 15" and 17" heights with a 9" headlight cutout
- Made of Lucite® for excellent optics and durability
- Windshield straps are available in polished stainless steel with CNC-machined billet aluminum fittings and stainless steel socket-head screws or "Night Shades" black version, which is a gradient black windshield with black E-coated stainless steel straps, fittings and hardware for a black-on-black sinister look
- Mounting hardware must be ordered separately; see below
- Optional Lowers available for additional windshield coverage; see page 20
- Made in the U.S.A.

QUICK-CHANGE MOUNT KITS FOR FATS/SLIM AND SPORTSHIELDS

- Memphis Shades Fats/Slim hardware kits feature Quick-Change mounting, which allows you to remove or swap out your Memphis Fats or Slim windshields in about one minute
- Hardware is custom-fit to each style of bike for no-hassle installation
- Hardware includes stainless steel bolts and CNC-machined aluminum mounting plates and anchors
- For additional coverage, Memphis Shades Lowers (page 20) and custom mounting kits (below) are also available

PLATE-ONLY HARDWARE KITS

- Allow changing from Fats/Slim to Sportshield or from Sportshield to Fats/Slim without purchasing the entire mounting hardware

INDEPENDENT LOWERS HARDWARE

- Mounts Memphis Shades Lowers plastic to most motorcycles
- Each kit contains two fork clamp/mounting assemblies and all necessary hardware to mount Lowers plastic
- Kits can be used with select Memphis Shades windshields and several OEM windshields
- Sold in pairs; must order Lowers plastic separately

MEMPHIS SHADES BATWING FAIRING

- Features clean aerodynamic shape
- Inner fairing structure is black ABS
- Fairing outer shell is opaque black Lucite with a class A finish that looks great as is, or can easily be painted
- Memphis Shades exclusive No-Tool Trigger-Lock mounting kits feature a detach system that allows you to quickly and easily remove or install your fairing, or swap out with other Memphis Shades windshields, sportshields or fairings
- Trigger-Lock kits are available in a combination of CNC-machined aluminum plates, stainless steel bolts and aluminum anchors or black E-coated plates, bolts and anchors for a clean appearance that's built to last
- Fairing is predrilled and fitted with push-out hole plugs for easy wind deflector installation
- Windshields are available in four height and several translucent color options, as well as clear and solar (a light tint with 72% visible light transmission) for Spoiler windshields see page 23
- Optional wind deflectors for increased downward airflow, windshield tri-pouch for storage and fairing trims for style are also available; see page 22
- Now you can add an optional sound system to the Batwing Fairing with Hogtunes' new speaker system, PART #4405-0218; sold separately
- Made in the U.S.A.

NOTE: Batwing Fairing is not compatible with any other fairing windshields, wind deflectors or accessories.
NOTE: Plate-only kits are for riders who already have a Memphis Shades Trigger-Lock windshield installed and do not need the anchoring hardware components.

WHAT TO ORDER

1. Batwing Fairing
2. Trigger-Lock Mount Kit
3. Windshield of your preference; height and color options are shown on next page, see page 23 for Spoiler windshields

SIDE WINGS

2350-0200

- Expand comfort pocket, channeling air outward while "cleaning" the flow
- Adjust to suit rider preference
- Can be installed/removed with windshield intact – Santoprene pads grips the windshield but do not mar the surface
- "Ghost" shade – a neutral tint with 85% light transmission barely noticeable, with just enough tint to make the edges disappear
- Fats Side Wings (PART #2350-0142) attach to any Memphis Fats windshield using CNC machined billet aluminum clamps – Black e-coated; can be mounted along the Booster Wing
- Side Wings (PART #2350-0200) fits all Memphis Fats windshields or similar windshields that measure either 3mm or 4.5mm thick (includes inserts for both sizes) features injection molded glass filled nylon clamps in place of the billet aluminum; can be mounted along with Hot Wing
- Made in the U.S.A.

DESCRIPTION	PART #	SUG. RETAIL	DESCRIPTION	PART #	SUG. RETAIL
Fats Side Wings	2350-0142	\$159.95	Side Wings	2350-0200	\$99.95

BOOSTER WING AND HOT WING

- Boost airstream upward – Venturi action speeds up the airstream while smoothing the flow – without buffeting
- Allows the use of a shorter shield; now easily look over your shield
- Both are made with "Ghost" shade – a neutral tint with 85% light transmission barely noticeable, with just enough tint to make the edges disappear
- Booster Wing (PART #2350-0139) attaches to any Memphis Fats windshield using CNC-machined aluminum clamps; black E-coated
- Hot Wing (PART #2350-0199) (lighter and less expensive) uses injection molded glass filled nylon clamps in place of the original billet aluminum clamps; fits Memphis Fats windshields or similar windshields that measure 3mm or 4.5mm thick (includes inserts for both sizes)
- Made in the U.S.A.

TIRE HUGGER SERIES FRONT FENDERS FOR VICTORY MODELS

- Steel fenders are thick enough to add rigidity to the front end by acting like a fork brace, but can still be cut or shaped enough for an even more Kustom appearance
- All fenders come predrilled and E-coated and are stamped, not spun, for the ultimate smooth long-lasting fender
- Fenders for 16", 17" and 18" wheels measure 6.25" outside width and will accommodate up to a 140-series tire
- Fenders for 21" wheel with inverted style forks measure 5.875" outside width and will fit the current 120/21 series tires on 3.5" wide rims
- Fenders for 21" wheel with conventional forks measure 4.5" outside width and will fit models listed with the stock narrow rim and a tire up to 100/100-21
- 6061 aluminum mounting blocks included for all applications
- Fenders come with choice of chrome or raw mounting blocks (see chart)
- Made in the U.S.A.

LOW-PROFILE TOURING SEATS WITH BUILT-IN BACKRESTS

- Solar-reflective leather in the seating area and automotive-grade vinyl on the sides; patented process reduces surface temperature by as much as 25°F for a cooler seat, higher durability and longer life over conventional leather or vinyl
- Lower position creates better rider position with improved styling
- Flexible urethane foam for maximum comfort
- Seats have built-in removable backrest for driver only
- Backrest included
- Feature the EZ Glide I system for a smooth and virtually corrosion-free operation
- $\frac{3}{16}$ " ABS thermoformed seat base with carpeted bottom to protect paint
- Include mounting hardware
- Fit with OEM sissy bar
- Made in the U.S.A.

NOTE: Convertible pad is not compatible with these applications.

ISO®, ISO®-FLAME AND TRANSFORMER GRIPS

FOR ALL VICTORY MODELS (EXCEPT VISION)

- Combine style and comfort in a soft, nonslip surface that dampens handlebar vibrations
- Recessed area between ISO™-Pads allows cooling airflow in warm weather
- Knurled accent ring adds a touch of class
- Flame grips feature a unique flamed pattern and Maltese Cross end caps
- Transformer grips feature interchangeable Widow, Zombie and Maltese cross medallions to mix/match with other Kuryakyn accessories; one pair of each style of emblem included
- All styles are sold in pairs

NOTE: Not compatible with bar-end weights.

STEERING STEM BEARINGS

- Designed as a drop-in replacement to upgrade OEM ball-type bearings to taper bearings (where ball-type bearings are used by the OEM)
- Designed as a replacement taper bearing seat (where taper bearings are original equipment)
- Kits come complete with both upper and lower taper bearing cups and cones and seals (both top and bottom seals are included in most kits)
- Tapered roller bearings decrease maintenance along with less wear and longer life

TRIDENT BAR-END MIRROR

- Transform the look of your handlebars and move the mirrors to a wider, more useful position
- For use with 7/8" or 1" diameter hollow handlebars
- Wedge-in style
- Handlebar must have at least 2 3/4" depth of open bar end
- Sold each

NOTE: Proper installation requires cutting or drilling a 5/8" hole in the end of the OEM grips. Proper installation requires 7/8" or 1" diameter handlebars with open ends. Not compatible with Kuryakyn chrome-style Throttle Bosses that screw to the end of the Kuryakyn grips or other grip end accessories or bar end weights. Not suggested for Buckhorn-style handlebars.

NOTE: Suggested installation of mirror is on the left grip clutch side only.

ALL ELECTRIC EASY SHIFT SPEED SHIFTER KIT FOR VICTORY VISION 08-10, CROSS COUNTRY/CROSS ROADS 10-11

- Easy shifting for rider comfort and convenience or for speed for the performance-oriented rider
- For performance, this is the best bang-for-your-buck product
- Gain a minimum of one bike length per shift
- Shift up at partial or full throttle and back down with the push of a button
- Eliminates the need to shift with your foot or clutch
- OEM shifting ability is retained after installation
- Clutch use is still required for starting and stopping when using these kits
- Uses state-of-the-art control module to send a signal from the button control to the shift solenoid
- Kit includes a stylish dual-button shift control for upshifts/downshifts, a chrome-plated electronic shift cylinder, ignition kill module and control modules
- Made in the U.S.A.

EVO3 LIGHTWEIGHT LITHIUM-ION BATTERIES

- EVO3 is the latest evolution of lightweight Lithium-Ion batteries built to fit the OEM battery compartment, but with multiple power options
- The lightest, most powerful starter battery available, no matter what you ride
- State-of-the-art Lithium Ferrous Phosphate (LiFePO4) technology
- Extremely durable with an exceptional static self-charge rate of only 10% per year
- Up to 10 lb. lighter than the stock battery
- "Dry" technology that can be mounted in any direction
- Extensively tested by professional race teams
- Environmentally friendly, non-toxic and recyclable
- No shipping restrictions
- Designed, developed and assembled in the U.S.A.

NOTE: Operating environment: 0°F (-18°C) to 140°F (60°C)

NOTE: For applications used in cold environments or with high-performance modifications, we recommend using the EVO3 Upgrade. The EVO3 Upgrade is dimensionally the same, but has higher burst cranking amps.

WHEEL BEARING AND SEAL KITS

- Exact OEM replacement bearing and seal kits bring back the steering and braking control lost due to worn or rusted wheel bearings
- Each kit includes necessary bearings and seals to completely rebuild each hub
- Double-sealed ball bearings keep moisture and contamination from entering bearing
- Seals ensure proper fitment
- Kits are available separately for front and rear wheels

BRAKE PADS

- Sintered metal brake pads are the OEM-type replacement pads for most bikes from the late 1970s to the present
- Sintered metal brake pads are proudly made in the U.S.A.; second-to-none in their stopping abilities and wear characteristics while still providing excellent reduction in noise and dust
- Organic Kevlar® pads are OEM type replacement brake pads for 1970s and earlier models
- Organic Kevlar® pads are the perfect choice for polished or chromed rotors and Billet Steel Rotors
- Both compounds of Drag Specialties brake pads are asbestos, nickel, and lead free

NOTE: Pads are 8mm thick.

NOTE: If you are using aftermarket billet steel rotors, it is recommended you use our Organic-Kevlar® brake pads to avoid damage to them. Sintered pads are not recommended for billet steel rotors as the pad material is too aggressive for those rotors.

CM55 Compound

CM66 Compound

HIGH-PERFORMANCE BRAKE PADS

- All Braking® brake pads are asbestos- and nickel-free
- Other brake companies stress friction over other performance factors – Braking uses an organic base material for outstanding friction along with a soft, non-aggressive metal that allows the pad to glide on the disc, providing better control
- All Braking brake pads are compatible with cast iron, stainless steel and Carbrion® materials and, when used with Braking rotors, provide the greatest control and braking power available

SM1 COMPOUND

- Semi-metallic compound – great OE replacement-type pad
- Best performance at lower temperatures
- Offers an aggressive response and is easily identified by the black backing plate

FRONT CM55 COMPOUND

- Universal, sintered metal compound that is a great OEM upgrade
- Offers a powerful initial bite and also a longer pad life
- Good pad choice for all types of street sport riding conditions

CM66 COMPOUND

- Unique Braking Semi Metallic compound formulated for the most demanding street riding and/or racing conditions
- Provides a very aggressive initial bite combined with a positive lever feeling
- Best performance obtained in higher temperatures

NOTE: For brake pad applications, see chart on page 54.

DP BRAKES

THE ORIGINAL SINTERED BRAKES

- DP Brakes brake pads are designed with sintered metal compounds to give your bike high-tech performance in all conditions
- Pads have a quick break-in period so you get maximum performance fast
- DP Brakes design and materials ensure consistent hard stops and fade-free performance
- Sintered metal compounds outlast more conventional organic or Kevlar® pads

STANDARD SINTERED METAL BRAKE PADS

- GG friction rated and made with DP Brakes' proven sintered metal material
- Gray-colored aluminum oxide-based ceramic material on rear of backing plate keeps heat away from caliper piston and fluid in extreme conditions for fade-free performance
- Pad compound gives equal performance in wet or dry conditions
- Ideal replacement for street and touring machines where durability is the prime requirement
- No brake fade

SPORT HH+ SUPERSPORT PADS

- Powerful, industry-high HH+ friction rating with no mileage penalty
- High-tech ceramic heat shield eliminates brake fade
- Dust-free compound design
- Quick break-in so you get maximum braking ability fast
- For front wheel use only

NOTE: For brake pad applications, see chart on page 54.

BRAKE PADS AND SHOES KEVLAR® BRAKE PADS

- The world's #1 selling organic disc brake pads
- Made with DuPont® Kevlar®
- Provide excellent stopping power without noise and rotor galling, even on polished rotors
- Fingertip control and strong, predictable brake response

DOUBLE-H SINTERED METAL PADS

- Feature the HH friction rating – the highest in the industry
- Provide maximum brake effect and last twice as long as organic pads

SEMI-SINTERED "V" PADS

- All-new semi-sintered construction containing 30% copper by weight within an organic matrix
- This design combines the long life of a sintered pad with the great feel and lack of rotor damage common with sintered pads
- Can be used to replace Kevlar or sintered metal compound pads

NOTE: For brake pad applications see chart on page 54.

BRAKE PADS

- SBS brake pads feature asbestos-free brakes using patented Unified Composite Technology (UCT)
- UCT technology completely blends all brake pad materials into a balanced, unified pad
- This balance ensures no hot spots, glazing, premature fading or excessive rotor wear
- The result is powerful, fade-free braking performance, even in extreme conditions

STREET CERAMIC PADS

- Designed for flawless performance on all street bikes NOT factory-equipped with sintered metal pads
- Provide strong stopping power no matter what the conditions
- Street Ceramic pads can replace sintered pads; however, STREETExcel sintered pads are recommended for those applications

STREETEXCEL SINTERED METAL PADS

- The best in sintered replacement pads for high-performance front (HS) and rear (LS) street applications
- Use advanced sintering process technology; perfect for sport riding
- The highest coefficient of friction in the lineup to provide maximum stopping power
- Formulation also offers high fade-resistance and quick cool-down under severe braking
- When you need to replace your worn sintered metal pads, choose STREETExcel; the sinter compounds with the power to stop you

NOTE: For brake pad applications, see chart on page 54.

GOLD-PLUS BRAKE PADS

- LRB's latest advancement in high-performance friction materials
- Racing formula offers extreme stopping power in both wet and dry conditions
- Dust and rotor wear are eliminated
- Proprietary blend of organics and trace iron requires no break-in
- Sold in pairs; order two pairs for dual-disc applications
- Made in the U.S.A.

Z-PLUS BRAKE PADS

- A matrix of carbon/Kevlar® and non-ferrous metal similar to LRB's Gold-Plus Pads in stopping performance, but softened slightly to provide longer service life in the lower temperature ranges found in common street use
- Dust-free, quiet and the best protection for polished rotors
- Ultra-long service life

FLOATING FRONT BRAKE ROTORS

FOR VICTORY CROSS ROADS, CROSS COUNTRY 10-14 (NON-ABS)

- Two-piece high-quality billet aluminum rotors are wrapped with a stainless steel band
- CNC-machined and quality tested to ensure a superior product
- Provides improved feel and stronger braking
- Rotors match RC Components wheels
- Made in the U.S.A.

465 SERIES SHOCKS

- High-pressure gas monotube design for the ultimate performance
- Five-position rebound adjustment to tailor the suspension for changing conditions and riding styles
- Threaded shock body with a wide range of adjustment to fine-tune preload and sag
- Hard anodized aluminum body and components for excellent durability and corrosion resistance
- 46mm bore and deflactive disc piston provides precise damping
- 16mm hard chrome shaft rides on custom viton seals for low friction and leak-free reliability
- Each shock is custom tuned (damping and spring rate) for each fitment
- Made in the U.S.A.

NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues such as swingarm/axle to exhaust contact as well as chain/belt guard or tire contact.

FLO STAINLESS STEEL, REUSABLE "SPIN-ON" OIL FILTER

- Made from laser-cut, medical-grade, 304 stainless steel micronic filter cloth, this filter provides 200% more filter area in many cases
- Stainless filter catches items down to 35 microns, which is about three times better than most good paper or brass filters
- Unlike glued paper filters, the FLO Oil Filter pleat seam is welded and able to withstand up to 600 degrees
- Filter maintains consistent flow under all conditions including extreme heat, the presence of water, and cold start-ups where paper filters can flow so poorly that they often cause the bypass valve to open and allow unfiltered oil to enter your engine
- Should be the last filter an owner ever needs; this high tech filter technology is widely used in all types of auto racing including NASCAR, Indy type cars, Formula 1 and in the aerospace industry where filtration is of the utmost importance

SUG. RETAIL\$129.95

PART # 0712-0149

OIL FILTER

- Parts Unlimited oil filters use the world's finest materials, literally: German paper, English glue, and Japanese zinc steel

HIFLOFILTRO® OIL FILTER

- The original Hiflofiltro factory was founded in 1955 and has been manufacturing filters for the OEM motor industry since 1963
- With the experience of more than five decades, constant research and development and featuring a completely modern production facility Hiflofiltro offers some of the best quality filters in the world
- TUV approved and production monitored to ensure OEM or better quality
- Constructed using the best materials available
- One of the broadest ranges of aftermarket coverage

SUG. RETAIL\$8.65

PART # 0712-0114 (HIFLOFILTRO #HF-198)

WRENCH-OFF™ OIL FILTER

- Designed to be compatible with modern synthetic and synthetic blended oils
- Synthetic Media allows for the higher-flow rates associated with synthetic and synthetic blended oils
- Large uniform pleated Synthetic Filter Media provides high-capacity and outstanding filtration
- Protected by a heavy-duty canister and base plate, with a double-rolled seal
- 17mm hex nut allows easy-on, easy wrench-off (where applicable)
- Pre-drilled for safety-wire security
- Pressure relief valve and anti-drain back valve (where applicable)
- Pre-lubed base gasket for easy, no-mess installation

Fi2000 POWRPRO WITH CVT TECHNOLOGY

- Continuously Variable Tuning (CVT) is the key to the remarkable performance the Fi2000 PowrPro delivers
- PowrPro uses electronic control technology that calculates the bike's rate of acceleration by reading crankshaft rotation at the flywheel and changes in load just as a dynamometer measures acceleration at the rear wheel
- PowrPro measures and adjusts fuel flow during acceleration to the injectors in microseconds for super-fast fuel tuning – continuously and automatically; net result: precise EFI tuning now happens in the real world in real time, nonstop, up to 80 times per second
- New patented technology unlike any other system on the market
- PowrPro tunes to precise air-fuel mixture to create maximum power 80 times per second (does not tune to a predetermined arbitrary AFR)
- Creates that adjustment to maximum power on every squirt of the injector
- It's like having the best custom map writing, dyno operator tuning your fuel every time you crank the throttle
- Tunes every gear, every roll on, every environmental change, every engine mod, lugging the engine, winding it out to redline: it reacts, verifies and adjusts when the bike is accelerating
- Provides perfect acceleration fuel settings in any condition, with any exhaust system with any engine modifications
- No matter what kind of new hardware you install on your bike – a new exhaust system, a freer-flowing air filter setup or even a big-bore hop-up kit with high-performance cams – PowrPro continues to analyze and tune your engine for peak performance
- No external adjustments needed
- No dyno needed
- No additional components needed
- Does not require wide band oxygen sensors

MANUFACTURER'S NOTE: Not legal for operation on public highways in the state of California.

CALIFORNIA A.R.B. POWER COMMANDER III USB-EX FOR VICTORY HAMMER 04-06

- Provides virtually the same tuning functionality as the "race only" Power Commander III USB
 - Compatible with Tuning Link software
 - Creates fuel mapping and custom maps
 - Maps created for Power Commander III USB can be loaded and will automatically be converted to the proper format
 - Will work with any exhaust system
 - Increases torque and horsepower
- MANUFACTURER'S NOTE: C.A.R.B. EO #D-619-1.**

SUG. RETAIL \$369.95

PART #

1020-0449

POWER COMMANDER III USB

- USB (Universal Serial Bus) port provides an instant and automatic connection to the Power Commander Control Center software; simply power up the unit and connect the PCIII USB to the computer with the supplied cable
- Provides precise information for fine-tuning a fuel-injected motorcycle when changing an air filter, installing a new exhaust system or doing additional engine performance modifications
- Each unit includes a built-in microprocessor and a specific map designed to improve engine performance over stock; Dynojet continuously maps new calibrations for each bike for downloading at their web site (www.powercommander.com)
- If you do not have a computer, you can change the settings with three touch buttons on the faceplate
- OEM-style wiring connectors with improved harness protection are supplied; no wiring modifications required
- Includes easy-to-follow instructions
- Direct injector control technology manages the fuel curve on models that do not have the sensors to monitor fuel adjustment
- Features an expansion port for future add-on modules from Dynojet
- Software is compatible with Windows 2000/XP/Vista and Windows 7
- USB special cable and 9V battery power adapter are included
- Made in the U.S.A.

MANUFACTURER'S NOTE: This product is intended to be used only on racing vehicles on closed courses, and not for use on roads or vehicles otherwise subject to emission control requirements. In California, this product should not be used on any vehicle that is registered or licensed for use on public roads.

Dynojet

POWER COMMANDER V

- Fuel control for each individual cylinder in a smaller enclosure
- "Warm-up" fuel adjustment (unit reads engine temp and allows fuel/timing adjustments based on the reading)
- All applications include ignition adjustment feature; allows full ignition timing control of each cylinder
- Reduced size from the PCIII USB
- Easy to install
- USB powered from computer; 9 volt adapter is no longer needed
- Two-position map-switching function built in
- Can add any Single Pole Single Throw (SPST) switch and toggle between two different fuel maps
- Gear/speed input allows for map adjustment based on gear
- Analog input allows user to install any 0-5 volt sensor
- Build an adjustment table based on analog input such as boost or temperature
- Power Commander V is capable of allowing each cylinder to be mapped individually and for each gear with the gear position input connected
- More tuning ranges than PCIII USB
- Enhanced "accel pump" utility
- Made in the U.S.A.

LCD ACCESSORY FOR POWER COMMANDER III USB/USB-EX AND POWER COMMANDER V

- Connects to any Power Commander USB via a "quick-disconnect" cable
- Designed to remain on the sled at all times
- Displays all available data from the Power Commander when connected
- Stores and switches between multiple maps in the on-board memory; maps can be sent to the Power Commander "on the fly"
- Adjust maps using the controls on the display screen
- Logs data for later analysis
- Store data for maps and logging by adding an SD Memory card; sold separately
- Can be easily removed from the bike to be programmed with a desktop computer
- USB programmable and upgradable
- Uses an active matrix TFT LCD 240 x 320 16-bit screen
- Made in the U.S.A.

FUEL MANAGEMENT CONTROLLERS

- Simple to use and understand system provides easy air/fuel ratio adjustment
- No computer or dyno required
- Tuning capabilities superior to Alpha N type controllers
- Easily adjusts for modifications – intake, exhaust, cams, etc.
- Easy push-button operation
- Load-based operation
- Three basic zones of operation, similar to a carburetor – one zone sets the “pilot jet” for idle and cruise, another sets the “needle jet” for acceleration and a third zone sets the “main jet” for heavy loading and wide-open throttle
- Plug-and-play installation
- Use OEM base codes; do not scramble base codes
- Made in the U.S.A.

MANUFACTURER'S NOTE: Not legal for street use in California.

4" HP-PLUS® PERFORMANCE SLANT DOWN MUFFLERS

- Cat-back mufflers provide a deep, mellow exhaust tone
- Horsepower and torque gains over stock mufflers are achieved in part by an internal expansion chamber in the baffle core
- The steel baffle core is machine wrapped with first a stainless steel wool then a high-temperature fiberglass blanket for acoustic longevity assurance
- Designed to enhance top end power while retaining good low end torque
- The one-piece, 16-gauge steel tubing muffler shell is finished in highly polished, duplex nickel chrome
- Install using factory mounting hardware, clamps and heat shields
- Sold in pairs
- Made in the U.S.A.

HIGH PERFORMANCE BATTERIES

- Specifically designed for high-performance engines that need extra cranking power
- Superior engineering features include an AGM (Absorbed glass-matt) radial grid design for maximum cranking amps
- High vibration resistance
- Spill-proof, pre-filled, pre-charged, maintenance-free sealed design
- Batteries include brass spacers, stainless steel nuts, bolts and star washers
- Made in the U.S.A.

NOTE: Factory-activated batteries should be charged once a month when not in service.

EVO3 LIGHTWEIGHT LITHIUM-ION BATTERIES

- EVO3 is the latest evolution of lightweight Lithium-Ion batteries built to fit the OEM battery compartment, but with multiple power options
 - The lightest, most powerful starter battery available, no matter what you ride
 - State-of-the-art Lithium Ferrous Phosphate (LiFePO4) technology
 - Extremely durable with an exceptional static self-charge rate of only 10% per year
 - Up to 10 lb. lighter than the stock battery
 - "Dry" technology that can be mounted in any direction
 - Extensively tested by professional race teams
 - Environmentally friendly, non-toxic and recyclable
 - No shipping restrictions
 - Designed, developed and assembled in the U.S.A.
- NOTE: Operating environment: 0°F (-18°C) to 140°F (60°C)**
- NOTE: For applications used in cold environments or with high-performance modifications, we recommend using the EVO3 Upgrade. The EVO3 Upgrade is dimensionally the same, but has higher burst cranking amps.**

BRAKE PADS

- Sintered metal brake pads are the OEM-type replacement pads for most bikes from the late 1970s to the present
- Sintered metal brake pads are proudly made in the U.S.A.; second-to-none in their stopping abilities and wear characteristics while still providing excellent reduction in noise and dust
- Organic Kevlar® pads are OEM type replacement brake pads for 1970s and earlier models
- Organic Kevlar® pads are the perfect choice for polished or chromed rotors and Billet Steel Rotors
- Both compounds of Drag Specialties brake pads are asbestos, nickel, and lead free

NOTE: Pads are 8mm thick.

NOTE: If you are using aftermarket billet steel rotors, it is recommended you use our Organic-Kevlar® brake pads to avoid damage to them. Sintered pads are not recommended for billet steel rotors as the pad material is too aggressive for those rotors.

DP BRAKES

THE ORIGINAL SINTERED BRAKES

- DP Brakes brake pads are designed with sintered metal compounds to give your bike high-tech performance in all conditions
- Pads have a quick break-in period so you get maximum performance fast
- DP Brakes design and materials ensure consistent hard stops and fade-free performance
- Sintered metal compounds outlast more conventional organic or Kevlar® pads

STANDARD SINTERED METAL BRAKE PADS

- GG friction rated and made with DP Brakes' proven sintered metal material
- Gray-colored aluminum oxide-based ceramic material on rear of backing plate keeps heat away from caliper piston and fluid in extreme conditions for fade-free performance
- Pad compound gives equal performance in wet or dry conditions
- Ideal replacement for street and touring machines where durability is the prime requirement
- No brake fade

SPORT HH+ SUPERSPORT PADS

- Powerful, industry-high HH+ friction rating with no mileage penalty
- High-tech ceramic heat shield eliminates brake fade
- Dust-free compound design
- Quick break-in so you get maximum braking ability fast
- For front wheel use only

NOTE: For brake pad applications, see chart on page 75.

BRAKES

Kevlar pads

Double-H pads

Semi-sintered "V" pads

BRAKE PADS KEVLAR® BRAKE PADS

- The world's #1 selling organic disc brake pads
- Made with DuPont® Kevlar®
- Provide excellent stopping power without noise and rotor galling, even on polished rotors
- Fingertip control and strong, predictable brake response

DOUBLE-H SINTERED METAL PADS

- Feature the HH friction rating – the highest in the industry
- Provide maximum brake effect and last twice as long as organic pads

SEMI-SINTERED "V" PADS

- All-new semi-sintered construction containing 30% copper by weight within an organic matrix
- This design combines the long life of a sintered pad with the great feel and lack of rotor damage common with sintered pads
- Can be used to replace Kevlar or sintered metal compound pads

NOTE: For brake pad applications see chart on page 75.

BRAKE PADS

- SBS brake pads feature asbestos-free brakes using patented Unified Composite Technology (UCT)
- UCT technology completely blends all brake pad materials into a balanced, unified pad
- This balance ensures no hot spots, glazing, premature fading or excessive rotor wear
- The result is powerful, fade-free braking performance, even in extreme conditions

STREET CERAMIC PADS

- Designed for flawless performance on all street bikes NOT factory-equipped with sintered metal pads
- Provide strong stopping power no matter what the conditions
- Street Ceramic pads can replace sintered pads; however, STREETExcel sintered pads are recommended for those applications

STREETEXCEL SINTERED METAL PADS

- The best in sintered replacement pads for high-performance front (HS) and rear (LS) street applications
- Use advanced sintering process technology; perfect for sport riding
- The highest coefficient of friction in the lineup to provide maximum stopping power
- Formulation also offers high fade-resistance and quick cool-down under severe braking
- When you need to replace your worn sintered metal pads, choose STREETExcel; the sinter compounds with the power to stop you

NOTE: For brake pad applications, see chart on below.

POWER COMMANDER V FOR INDIAN CHIEF, CHIEF DELUXE, CHIEFTAIN 14

- Fuel control for each individual cylinder in a smaller enclosure
- "Warm-up" fuel adjustment (unit reads engine temp and allows fuel/timing adjustments based on the reading)
- Includes ignition adjustment feature; allows full ignition timing control of each cylinder
- Easy to install
- USB powered from computer; 9 volt adapter is no longer needed
- Two-position map-switching function built in
- Can add any Single Pole Single Throw (SPST) switch and toggle between two different fuel maps
- Gear/speed input allows for map adjustment based on gear
- Analog input allows user to install any 0-5 volt sensor
- Build an adjustment table based on analog input such as boost or temperature
- Power Commander V is capable of allowing each cylinder to be mapped individually and for each gear with the gear position input connected
- Enhanced "accel pump" utility
- Made in the U.S.A.

SUG. RETAIL \$379.95

LCD ACCESSORY FOR POWER COMMANDER III USB/USB-EX AND POWER COMMANDER V

- Connects to any Power Commander USB via a "quick-disconnect" cable
- Designed to remain on the bike at all times
- Displays all available data from the Power Commander when connected
- Stores and switches between multiple maps in the on-board memory; maps can be sent to the Power Commander "on the fly"
- Adjust maps using the controls on the display screen
- Logs data for later analysis
- Store data for maps and logging by adding an SD Memory card; sold separately
- Can be easily removed from the bike to be programmed with a desktop computer
- USB programmable and upgradable
- Uses an active matrix TFT LCD
- 240 x 320 16-bit screen
- Made in the U.S.A.
