Moose Racing's Ratel: All Weather Soft Shell Jacket, is modeled and named after one of the world's most fearless animals. Lightly nicknamed the Honey Badger, there is nothing sweet about this maniacal creature. Hailing from the baron deserts of Africa and the greater Middle East is an animal with the cojones to tango with a Rattle Snake and the jewels to car jack a Tiger. Their tank-like frame is wrapped with a tough skin so they can easily shed attackers but flexible enough to contort their bodies while tearing the head off an unsuspecting Viper. Honey Badgers also posses qualities to bring about a climate

assault. Natural, protective skins allow Honey Badgers to endure all types of weather like rain, wind and even snow. These qualities make up Moose Racings all weather soft shell jacket. This durable soft shell coat can with stand almost anything you could throw at it from rain, snow, wind, minor abrasions or a combination of everything. We engineered this coat to form fit without restrictions. The soft 3-layer membrane material is tough but has enough maneuverability and stretch not to restrict your active movements.

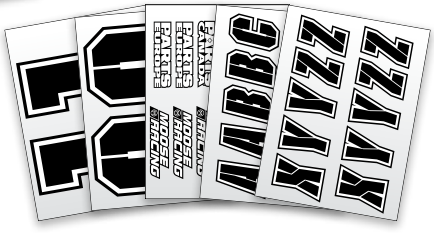

RATEL *CASUAL COAT* — $89.95

- Made with a breathable, three-layer, soft shell membrane material
- DWR (Durable Water Repellent) finish enables light rain & snow to bead off outer material. This prevents outer shell from becoming saturated & allows the material to breath naturally
- Light weight soft material is flexible without being bulky enabling range of motion
- Abrasion/Water/Wind Resistant
- Soft inside material
- Extra long torso fit
- Pouch pockets, backed up with zippered valuables pockets
- Zippered chest pocket with storm flap
- Full hood with elastic drawstring and visor
- Available in sizes M-2XL

CARBON FIBER SKID PLATES BY ELINE — $159.95

- Thick composite plates with many advantages over aluminum
- The use of Kevlar® gives our composite a longer fatigue life and greater tensile strength than aluminum
- Composite plates are molded to the exact shape desired, making for a closer fit and more protective plate
- Composite plates absorb vibration and do not amplify sounds like aluminum plates do
- When hit hard, aluminum permanently deforms, bending frame tubes and slicing into water pumps
- Composite plates will bounce back from hard hits and look great long after aluminum plates give up
- Skid plates protect the side engine cases and the water pump in addition to the frame and the center case
- Designed with a high front to keep mud from building up on the engine
- Mounting hardware included
- Made in the USA

STAINLESS STEEL BRAIDED BRAKE AND CLUTCH LINES

$46.95 — $69.95

- Swivel union ends are the secret to easier fitting, and ensure a kink and stress free installation
- Venhill Engineering in the UK makes Moose Racing Stainless Steel Brake and Clutch Lines to the highest specifications
- Each line is made from top quality PTFE coated hose, wrapped with British made stainless steel, and PVC coated for protection and great looks
- Rubber protection boots and extra rigid tubing are used to protect vulnerable areas from heat and impact and to prevent hose flex under compression
- Each line is designed to withstand a minimum of 14,000 PSI
- Installing our stainless lines gives a large performance increase by significantly reducing expansion under pressure, and absorption of water when compared to stock rubber hoses

- This is the top of the line. The strongest, most durable sealed chain that we offer
- FB = Fine Blanking, an incredibly precise manufacturing process that yields perfectly cut links
- Tight tolerances make the plate, pin, and bushing union accurate and strong
- Due to the accuracy of the cuts and the use of stronger alloyed steel the FB has our highest tensile strength rating, nearly 8,000 lbs
- Special sealing rings are chemically treated to gain strength and reduce friction
- The FB treatment allows the O-rings to be impregnated with grease
- FB rings are stronger and more durable than X-rings, with significantly less friction
- Gold links and rollers, silver inner plates, pins and bushings
- Clip-type connecting link included
- Recommended for applications 450cc and above
- CC recommended / average tensile load - 450cc & above / 7,937 lb
- Replacement connecting link available
- Imported

CHAIN ADJUSTER EXTENDERS	M01067

CHROMOLY-STEEL FRONT SPROCKETS

$12.95-$20.95

- Machined from impact and wear resistant chromoly steel
- Inner splines are broached to provide maximum spline-to-countershaft contact. This helps distribute driveline forces over the largest possible area
- Heat treated, then finished with a nickel coating for corrosion resistance and lubricity
- BE SURE TO CHECK FOR CLEARANCE WHEN ORDERING SIZES LARGER THAN STOCK
- Made in the USA

ALUMINUM REAR SPROCKETS

$36.95-$61.95

- The 7075 T651 aluminum we use for these sprockets receives an extra tempering which reduces distortion and provides optimal thickness vs. typically thinner 7075 T6 sprockets
- 100% machined, no stamping or grinding
- Optimal tooth thickness results in maximum tooth and chain contact
- We leave the "cleaning" grooves out of our sprockets, because more aluminum contacting your chain means longer chain and sprocket life
- Moose Racing rear sprockets come anodized in black; select Moose Racing rear sprockets are available in blue, orange, and red
- Made in the USA

SPROCKET LOCK BOLT KIT

$9.95

- Set of six grade 10 steel sprocket bolts and Fuji-lock nuts

INTAKE & EXHAUST VALVE KITS

$179.95-$269.95

- Each kit includes stainless steel valves, high-rev valve springs, lightweight retainers, and Viton® valve seals
- Stainless steel valves are made from a one-piece forging featuring 21-4N material
- Valves are heat treated and feature a nitride process on the surface, which improves valve wear and overall performance
- High-rev springs are coiled with a proprietary high-quality wire that undergoes a heat treating and stress-relieving process, which dramatically increases the spring's life-cycle and improves valve stability at high RPMs
- Valve seals are made with Viton® rubber which allows for greater seal and less stiction
- Made in the USA

WHEEL SPACERS $5.95 — $34.95

- Replace or upgrade OEM wheel spacers with these durable parts
- Water and dirt grind between wheel bearing seals and soft OEM aluminum wheel spacers, this creates grooves and allows for bearing contamination
- Moose Racing wheel spacers feature hardened steel contact surfaces
- This makes for a tight seal that will last for years and keep your bearings fresh
- Our spacers are made from either anodized aluminum with a press fit - hardened steel shell, or solid - hardened and ground bearing steel, depending on application
- Upgrade to Moose Racing wheel spacers when you replace damaged wheel bearings, or before you have to
- Imported

HOW TO CHOOSE THE PROPER KILL SWITCH:
THERE ARE TWO TYPES OF ELECTRICAL SYSTEMS USED ON ATVS, NORMALLY OPEN (N.O.) AND NORMALLY CLOSED (N.C.) BOTH WORK BY GROUNDING THE PRIMARY IGNITION LEAD. N.O. SWITCHES ARE THE OPEN TYPE, THEY WORK BY GROUNDING THE PRIMARY IGNITION LEAD WHEN THE TETHER IS PULLED AWAY FROM THE BARS. N.C. SWITCHES WORK THE OPPOSITE OF N.O. N.C. ARE TYPICALLY USED ON BATTERY TYPE IGNITIONS WHICH MAY HAVE AN IGNITION KEY AS AN IDENTIFIER. MOST NEWER MORE COMPLEX ELECTRICAL SYSTEMS ARE N.C. IF IN DOUBT? CHECK YOUR MACHINE'S WIRING SCHEMATIC.
