423X™

423X ATV/UTV WHEELS > $96.95 / **LUG NUTS** > $19.95

Whether it's in the woods, deep mud or sand, the 423X is prepared to take it on. Handles load capacities from 900 lbs. for the 14x7 front to 1,300 lbs. for the 14x8 rear which meet, or exceed all current market requirements. 100% x-rayed on the production line to ensure quality and reliability. Higher offset will help keep the overall width of the UTV down so it will fit on trailers better. Center caps are included with each wheel (replacement center caps 0223-0164), but lug nuts must be ordered separately.

BALL JOINT AND KING PIN KITS > $21.95 - $52.95

Ball joint kits offer a considerable cost savings over OEM. Steel housing on some applications replace aluminum joints standard on OEM parts. POM-M90 bearing cup isolates steel rod from housing. OEM does not supply replacement ball joints on many applications. King pin kits are for smaller ATVs where ball joints are not used. Bearings are all hardened steel.

POLARIS 4X4 HUB CLUTCH > $129.95

Much stronger than OEM and less expensive. The stock unit uses a weak cast-aluminum cage that is prone to breakage; we use a 6061 billet machined cage that is thicker throughout the fingers to make it much stronger. This ready to bolt-in unit also includes a machined-steel inner splined hub and heat-treated steel rollers. Garter spring to hold everything in place. Installs on drive shafts with a spline. Replaces Polaris part #s 1520214 and 1520281. Made in the USA.

NEW

POLARIS 4X4 HUB CLUTCH CAGE > $54.95

OEM is a weak stock cast-aluminum roll cage. We went the extra mile and manufactured this heavy-duty billet aluminum cage out of 6061. It is thicker in all the right places and will accept your stock inner hub, rollers, and spring. Replaces Polaris part #3250028. Made in the USA.

UTV STEERING RACK TIE ROD ASSEMBLY KIT > $14.95 - $88.95

Can save you hundreds of dollars versus the cost of a complete steering rack assembly. The inner rod assemblies have increased shaft diameters to improve strength. Each kit includes heavy-duty inner and outer rod ends with replacement boot, clamps and any required lock washers. Outer tie rod ends are also available individually.

- **Outer Tie Rod End** - contains one tie rod end. This end attaches to the steering knuckle (two required per vehicle).

BRAKING

BRAKE PADS & SHOES BY DP BRAKES

Pads are constructed of durable sintered metal which stands up to the toughest conditions and provides equal braking power, wet or dry. Brake shoes are asbestos-free and offer durability and performance.

XCR BRAKE PADS > $16.95 - $46.95

Ultimate wet condition pads. Low-wear S-47 sintered metal compound outlasts the gnarliest conditions. High-tech gray zirconium-based ceramic applied extra thick to protect brake fluid from heat.

QUALIFIER BRAKE PADS > $16.95

Latest generation of Kevlar® based organic material. Progressive feel and rider feedback. No rotor wear and quiet.

HIGH PERFORMANCE 4-STROKE PISTON KITS BY CP PISTONS > $461.95 - $479.95

Pistons feature x-style forgings and fully boxed-style (race pistons). Forgings come standard with skirt coating which reduces friction, which in return reduces heat. Our race piston kits include DLC pin. Internalbracing maximizes durability while decreasing friction in the pin assembly. This technology had been proven and used because of its high resistance to abrasive wear, which extends the service life and reliability under extreme conditions. Full radius dome designs maximize quench while eliminating hot spots that promote detonation. Each kit includes a piston, wrist pin, circlips and a top end gasket kit. Made in the USA.

OEM REPLACEMENT COOLING FANS > $112.95 - $225.95

Easily installs using original mounting hardware. All fans are waterproof and dustproof. All fans (except Polaris fans) are typically 25% higher CFM than the stock fan. CFM = cubic feet per minute; it's a rating used to tell how much airflow a fan has. The Polaris fans are OEM compatible in design and output. Less expensive than factory replacements with more performance.

NEW MIPS® TECHNOLOGY!

HOW MIPS® WORKS

In a helmet with MIPS Brain Protection System (BPS) there is a Low Friction Layer that separates your head and the helmet. When a helmet with MIPS® BPS is subjected to an angled impact, the low friction layer allows the helmet to slide relative to the head. The MIPS® BPS is designed to add protection in helmets against the rotational motion. The rotational motion is a combination of rotational energy (angular velocity) and rotational forces (from angular acceleration) that both may affect the brain and increase the risk for minor and severe brain injuries. MIPS® BPS has been scientifically proven to reduce rotational motion in certain impacts when implemented in a helmet by absorbing and redirecting rotational energies and forces that otherwise may be transfered to the brain.
