[1] LIFT KIT NEEDED FOR 26" OR LARGER TIRES

[2] SPORTSMAN XP 2009 IS 5" WIDER WITH AFTER MARKET WHEELS

BALL JOINT AND KING PIN KITS > $18.95-$52.95

Ball Joint kits offer a considerable cost savings over OEM. Steel housing on some applications replace aluminum joints standard on OEM parts. POM-M90 bearing cup isolates steel rod from housing. OEM does not supply replacement ball joints on many applications. King pin kits are for smaller ATVs where ball joints are not used. Bearings are all hardened steel. Made in USA.

JET KIT/IGNITION MODULE KIT > $112.95-$242.95

The digital ignition is preprogrammed with a performance advance curve while at the same time increasing the vehicle's rev limit. On modified vehicles where the engine makes power right up to redline the increased rev limit will allow for peak performance and additional top end power. Made in USA.

JET KITS > $59.95-$82.95

Stage 1: Intended for ATV's with a stock engine using the stock air box, air filter and stock pipe. Stage 1 kits are fully adjustable to allow the use of a well designed aftermarket pipes and stock replacement air filters like K&N. In most cases power increases of approximately 5% throughout the entire power range can be achieved.
Stage 2: Intended for ATV's with a stock or mildly tuned engine using a well designed aftermarket pipe with a modified air box and a stock replacement air filter. Stage 2 kits are designed for applications where individual filters cannot be installed and for applications where air box modification improves the engine's performance. In most cases power increases of approximately 8% can be achieved.
Stage 3: Intended for ATV's with stock or mildly tuned engines using a well designed aftermarket pipe and individual air filters. In most cases power increases of 10-15% can be achieved. However drive ability may be compromised particularly with short stroke, high rpm motors. On some modern engine and air box designs, individual filters and proper jetting offer no performance improvement yet compromise drive ability, in such cases stage 3 kits are not available. Made in USA.

HIGH PERFORMANCE 4-STROKE PISTON KITS BY CP PISTONS > $2.95-$459.95

Pistons feature x-style forgings and fully boxed-style (race pistons) forgings for ultimate strength, minimizing friction, durability, power and weight reduction. Fully-boxed style (race pistons) forgings come standard with skirt coating which reduces friction, which in return reduces heat. These are called out in the application chart. Our race piston kits include DLC pin. Internal bracing maximizes durability while decreasing friction in the pin assembly. This technology had been proven and used because of its high resistance to abrasive wear, which extends the service life and reliability under extreme conditions. Full radius dome designs maximize quench while eliminating hot spots that promote detonation. Each kit includes a piston, wrist pin, circlips and a top end gasket kit. Made in USA.
