DEMAND THE BRAND

It was born out of mud holes, snow drifts and ridge tops. Seventeen years ago Moose Utility Division set out on a mission to provide our customers with the most diverse line-up of ATV and UTV accessories on the planet. You see friends, your unit wasn't built to accomplish one thing, but rather a multitude of tasks. We get this and that is why we created this versatile, outdoor beast. It's in our blood and we think you'll agree we have succeeded, but it is a work in progress. The following pages are just an example of our commitment to making sure you have accomplished all you want to at the end of the day. We also realize it may leave you hungry for more and that is why we are constantly updating and adding new products. We're doing it right now and will continue to do it because you deserve the best and settle for nothing less. Demand the brand!

901K *tire* / 387K *wheel* KITS

901X / 387X TIRE & WHEEL KITS > \$221.95-\$242.95

Kits combine the Moose 901X tires mounted on the stylish and durable 387X wheels. The 901X with its offset V tread design and side lugs offers high performance in mud, snow and sand. 6 ply construction for superior durability and puncture resistance. Lugs are recessed in the center for added surface area for better traction. Pebbled design in between the lugs makes for better clean out between lugs when riding in sticky clay and mud. 387X wheels are 100% X-rayed on the production line to ensure quality and reliability. Wheels handle load capacities from 675 lbs. for the 12x7 front to 1,150 lbs. for the 12x8 rear which meet, or exceed all current market requirements. Front is 26 x 9-12, rears are 26 x 12-12. Available in gloss black or machined finish with chrome center caps and rivets. Center caps are included with each wheel, but lug nuts must be ordered separately. Imported.

BALL JOINT AND KING PIN KITS > \$18.95-\$52.95

Ball Joint kits offer a considerable cost savings over OEM. Steel housing on some applications replace aluminum joints standard on OEM parts. POM-M90 bearing cup isolates steel rod from housing. OEM does not supply replacement ball joints on many applications. King pin kits are for smaller ATVs where ball joints are not used. Bearings are all hardened steel. Made in the USA.

HEAVY DUTY AXLES W/ VOODOO AXLE TECHNOLOGY >\$495.95

If you're ATV or UTV has a lift kit or extended A-arms, and requires long travel suspension, you need Moose Heavy Duty Axles-With Voodoo Axle Technology. Our revolutionary design provides ultra-high strength and the ability to operate at angles other can't. To accommodate suspension travel the axles utilize a slip spline that allows the axle to compress and extend 2". This helps to prevent disengagement of the inner CV joint from the transaxle when the suspension is at full droop. Telescoping axle bars are carried on linear motion ball bearings for smooth action that won't bind under load. Typical axles use inboard CV joints that must both operate at an angle and allow suspension travel. This dual purpose design limits articulation angle to about 25°, while travel is limited to 1.25"-1.5", which is inadequate for ATV's and UTV's with lift kits, or long travel suspension. These axles utilize fixed Rzeppa inner CV joints that allow 45° of articulation, while a slip spline in the axle shaft provides 2" of travel. Made in the USA.

JET KIT/IGNITION MODULE KIT > \$112.95-\$242.95

The digital ignition is preprogrammed with a performance advance curve while at the same time increasing the vehicle's rev limit. On modified vehicles where the engine makes power right up to redline the increased rev limit will allow for peak performance and additional top end power. Made in the USA.

POWER COMMANDER V

> \$379.95-\$390.95

Less than half the size of the PCIII USB. USB powered from computer (9V adapter no longer needed for programming). Two-position map switching function built in (map switch not included). Gear/speed input allows for map adjustment based on gear and speed. Analog input allows user to install any 0-5V sensor and build an adjustment table based on its input such as boost or temperature. With gear-position connected, the PCV is capable of allowing each cylinder to be mapped individually and for each gear. Unit has a -100/+250% fuel change range (up from -100/+200%), which allows more adjustment.

Ten throttle position columns (up from nine on PCIII USB). Enhanced "accel pump" utility (increased adjustment and sensitivity ranges).

Made in the USA.

¹ PARTS INCLUDED FOR TWO CARBURETORS

JET KITS > \$59.95-\$82.95

Stage 1: Intended for ATV's with a stock engine using the stock air box, air filter and stock pipe. Stage 1 kits are fully adjustable to allow the use of a well designed aftermarket pipes and stock replacement air filters like K&N. In most cases power increases of approximately 5% throughout the entire power range can be achieved.

Stage 2: Intended for ATV's with a stock or mildly tuned engine using a well designed aftermarket pipe with a modified air box and a stock replacement air filter. Stage 2 kits are designed for applications where individual filters cannot be installed and for applications where air box modification improves the engine's performance. In most cases power increases of approximately 8% can be achieved.

Stage 3: Intended for ATV's with stock or mildly tuned engines using a well designed aftermarket pipe and individual air filters. In most cases power increases of 10-15% can be achieved. However drive ability may be compromised particularly with short stroke, high rpm motors. On some modern engine and air box designs, individual filters and proper jetting offer no performance improvement yet compromise drive ability, in such cases stage 3 kits are not available. Made in the USA.

INTAKE & EXHAUST VALVE KITS > \$179.95-\$269.95

Each kit includes stainless steel valves, high-rev valve springs, lightweight retainers, and Viton® valve seals. Stainless steel valves are made from a one-piece forging featuring 21-4N material. Valves are heat treated and feature a nitride process on the surface, which improves valve wear and overall performance. High-rev springs are coiled with a proprietary high-quality wire that undergoes a heat treating and stress relieving process, which dramatically increases the spring's life-cycle and improves valve stability at high RPMs. Valve seals are made with Viton® rubber which allows for greater seal and less stiction. Made in the USA

HIGH PERFORMANCE 4-STROKE PISTON KITS BY CP PISTONS > \$459.95

Pistons feature x-style forgings and fully boxed-style (race pistons) forgings for ultimate strength, minimizing friction, durability, power and weight reduction. Fully-boxed style (race pistons) forgings come standard with skirt coating which reduces friction, which in return reduces heat. These are called out in the application chart. Our race piston kits include DLC pin. Internal bracing maximizes durability while decreasing friction in the pin assembly. This technology had been proven and used because of its high resistance to abrasive wear, which extends the service life and reliability under extreme conditions. Full radius dome designs maximize quench while eliminating hot spots that promote detonation. Each kit includes a piston, wrist pin, circlips and a top end gasket kit. Made in the USA.
