

RACING LINE COMPLETE EXHAUST SYSTEMS*

- Hexagonal mufflers feature a carbon fiber outlet cap to match the design of each bike
- Joint of the inlet cap is milled on a state-of-the-art CNC machine and connected by high-quality, silicon-shielded tempered springs
- Include a lightweight, compact and high-temperature-resistant carbon fiber muffler clamp
- Conical shaped and hydroformed header is made of stainless steel
- When the position of the exhaust system needs to be changed and the stock bracket is no longer usable, a custom bracket is included

SLIP-ON SERIES*

- Hexagonal mufflers feature a carbon-fiber outlet cap to match the design of each bike
- Outlet cap, perforated inner sleeve and inlet cap are all made of titanium
- Joint of the inlet cap is milled on a state-of-the-art CNC machine and connected by high-quality silicon-shielded tempered springs
- Include a lightweight, compact and high-temperature-resistant carbon fiber muffler clamp
- Conical or cylindrical link pipe is made of stainless steel or titanium; shape is determined on the basis of tests of the connection of the link pipe with the muffler to obtain maximum performance increase
- Carbon fiber heat shield included, if called for in the design

1811-3508

1811-3515

STAINLESS STEEL HEADPIPE

- Optional available headers from the finest materials
- Offer an upgrade to a full system when used with the Akrapovic slip-on exhaust system
- Let your bike stand out with more power, beautiful design and the unique Akrapovic sound

CARBURETOR REPAIR KITS

- Kits include all of the necessary components to repair a carburetor
- Models with multiple carburetors include components to repair all carburetors
- Kit includes all necessary O-rings, gaskets, jets, needle, mixture screw, float bowl screws, float valve needle and seat (needle jet and other pressed-in jets are not included in kit)
- OEM jet sizes and slide needles are included in the kit
- NBR rubber material is used on all O-rings and rubber gaskets; NBR has excellent resistance to the ethanol used in today's fuels
- Applications that use paper float bowl gaskets are upgraded to High Performance Interface Gasket material
- Components included in the kits are based off of U.S. models and discretion must be used when attempting to install the kit on a non-U.S. model

EZ TRAIL BOOT XL AND INSTALLATION TOOL

- XL version of the original EZ Trail boot designed to fit UTVs and large ATVs
- Expandable universal CV boot, slides and expands over reusable cone tool for trail side CV boot replacement
- Material is expandable yet tough enough to be a permanent fix
- Two clamping diameters ensure a good fit on most vehicles
- Small end diameter 19mm; large end clamping diameters 67mm and 75mm trim to length
- Boot material stays flexible in extreme cold temperatures
- Kit includes one universal boot, one reusable cone tool, two stainless steel clamps, grease pack, and silicone cone lube and instructions
- Lithium based molybdenum grease ensures good lubrication for long CV joint life
- Replacement XL Universal boot available separately, PART #0213-0789
- See pages 464-465 of the 2018 Parts Unlimited ATV & UTV catalog for the complete line of All Balls EZ Trail CV boot kits

8BALL EXTREME DUTY AXLES

SUG. RETAIL
STARTING AT
\$155.95

- Axles feature eight precision ball bearings with cage and race sizes that are up to 35% larger for greatly increased CV joint strength
- Designed with a larger-than-stock chromoly axle shaft and low-profile alloy clamps
- Axles are 20% stronger than OEM, 50% stronger than competing aftermarket axles and last 12 times longer than competing axles
- Manufactured in facilities that are certified and meet the ISO 9001 quality manufacturing standard

NOTE: For a complete list of applications, please go to parts-unlimited.com and PartsNetWeb.com.

Dynojet**POWER COMMANDER V***

- Fuel control for each individual cylinder in a smaller enclosure
- "Warm-up" fuel adjustment (unit reads engine temp and allows fuel/timing adjustments based on the reading)
- Reduced size from the PCIII USB
- Easy to install
- USB powered from computer; 9 volt adapter is no longer needed
- Two-position map-switching function built in
- Can add any Single Pole Single Throw (SPST) switch and toggle between two different fuel maps
- Gear/speed input allows for map adjustment based on gear
- Analog input allows user to install any 0-5 volt sensor
- Build an adjustment table based on analog input such as boost or temperature
- Power Commander V is capable of allowing each cylinder to be mapped individually and for each gear with the gear position input connected
- More tuning ranges than PCIII USB
- Enhanced "accel pump" utility
- Made in the U.S.A.

POWER VISION CX*

FOR ALL INDIAN AND 08-16 106" VICTORY MODELS

- Flash performance tunes via OEM diagnostic connector, no need to remove and send out ECU
- Display vehicle data channels in real time
- Weather-resistant design for use in all conditions
- High-contrast display is viewable in direct sunlight
- Fueling revised for maximum power and torque
- Tunes available for popular aftermarket modifications
- Spark timing optimized for 91-93 octane fuel
- Rev limit and speed limits raised
- Torque limiting functions reduced or eliminated
- Revised drive-by-wire throttle profiles

FOR ALL POLARIS UTVS

- Performance tuner and data monitor that offers the latest flash tuning technology, real-time data monitoring, and other industry exclusive features
- Rev limit raised in high and low gears
- Fueling revised for maximum power and torque
- Spark timing optimized for 91-93 octane fuel
- Speed limit raised in high and low gears
- Torque limiting functions reduced or eliminated
- Revised drive-by-wire throttle profiles for high and low gears
- Lower fan turn-on temps
- Left foot brake mode enabled
- Retains ADC and Turf mode where applicable

NOTE: Does not come with pre-loaded tunes.

CATACLEAN

- EPA Approved
- Easy to use - simply pop, pour and go
- 4oz. bottle designed for use in motorcycles, ATV's, side-by-sides, jet skis, etc.
- Does not alter fuel composition and is safe for gasoline engines
- Restores, maintains and helps protect the catalytic converter, oxygen sensors, fuel injectors and cylinder heads
- Lowers total hydrocarbon emissions by up to 50%
- Reduces harmful carbon build-up on oxygen sensors
- Improves fuel efficiency
- Restores engine performance
- Legal in all 50 states
- Patented formula

NOTE: Cataclean has been tested and is proven to be for use in 2-stroke engines. For proper use, follow instructions on bottle regarding mixture amount with gasoline. Cataclean must be mixed thoroughly with Gas BEFORE application of 2-stroke engine oil to fuel. Failure to mix Cataclean with gas prior to inclusion of 2-stroke engine oil may result in damage to engine.

ULTRA PROBEND HCM HANDGUARDS

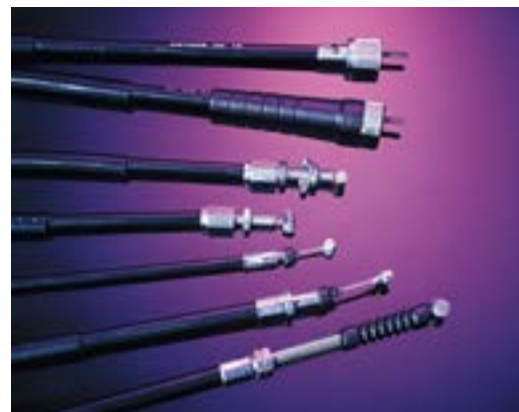

- The trademark Probend dip at the outside end allows freedom of mobility for your hands
- Handlebar clamp mounts (HCM) allow for superior clearance on a wide range of bars
- Patented CNC billet machined bar, made from 6061 aircraft-quality aluminum
- Index bolt system offers position customization
- New shield design features a newly reformed ergonomic profile, removable dual zone ventilation system and integrated abrasion guard with slimmer profile
- New grinder design maximizes the protection of your bars
- Fit 7/8" and 1 1/8" bars

¹ Push/pull cable set.

T3 SLIDELIGHT CLUTCH CABLES

- T3 cables reduce fatigue, provide better clutch feel and dramatically increase cable life
- The increased efficiency of Motion Pro's new T3 clutch cables provides a lighter, smoother pull, and significantly increases durability over conventional OEM cables
- In the course of a typical enduro, you might easily pull the clutch lever over 30 times per mile – in the course of a 50 mile race, a T3 clutch cable can spare your fingers over 400 lb. of pulling, reducing hand stress, fatigue and arm pump, and give you increased control at the end of the race
- T3 cables also provide dramatically increased durability
- Motion Pro's tests show that the liner on normal cables can wear out and result in metal-to-metal contact in less than 1,200 cycles, resulting in grinding, friction-generating metal-to-metal contact
- Test results prove that the proprietary liner material in T3 cables can last 30,000 cycles with only minimal wear, giving you a longer-lasting cable that provides consistent smooth performance long after conventional cables have worn out

REV2 THROTTLE KIT FOR SUZUKI GSX-R1000 17-18

- The most advanced variable-rate throttle in the world
- Innovative reel changing system lets you tailor the throttle rate to riding conditions and rider preference
- Ultra-compact housing with snap-together elbows makes it easy to install and change reels
- Sleek design requires less handlebar space for lever clearance and throttle position
- Uses smaller reels for slower throttle rate and larger reels for faster throttle rate
- Included cam reel provides progressive throttle response preferred by some riders
- Unique reel design allows fast reel changes
- Cable boot keeps dirt and dust out for reliable and smooth operation
- Billet aluminum inline cable adjusters for easy installation and adjustment
- Lower section of cables uses 5mm housing with PTFE liner for reduced friction, increased routing flexibility and lighter weight
- Upper section of cables uses 6mm housing to provide solid support for adjusters
- Simple to install and maintain
- Kit includes Rev2 throttle assembly with throttle tube, Motion Pro Revolver black vinyl cables, Motion Pro RoadControl grips and Rev2 Street cam reel
- Standard interchangeable reels 35mm, 40mm, 45mm, 50mm are also included
- Designed by Motion Pro
- Patent pending

WARNING: Rev2 Kits have cables specifically designed for fitment on specific models, but the Rev2 throttle itself is not model-specific. Therefore, in some situations, the Rev2 kit may not be a direct bolt-on installation due to space limitations on the stock handlebar. In some installations, it may be necessary to move other control components on the stock handlebar, shorten the Rev2 throttle tube and grip, install longer aftermarket handlebars, or possibly all of the above. It is up to the end user to determine the best method for fitment on their motorcycle, and ensure that the Rev2 kit is installed properly and with the correct clearances for safe operation. Installation should be done by a qualified mechanic and carefully checked for proper function. Improper installation could result in great bodily injury or death.

NYLON THROTTLE GRIP SLEEVE

SUG. RETAIL
\$8.99

- Replaces OEM throttle sleeve
- Heavier duty and exceeds the quality and durability of the OEM sleeve
- Nylon fabric composite material
- Open-end design for use with bar ends
- Molded ridges to help secure grips
- One-piece tube and reel design
