

DR 350 Expedition Rack Installation Instructions

PN# 1510-0170

Remove original rack if installed. The frame loop over the rear fender will remain in place. Remove the seat. Remove front bolt on rear fender loop bracket. Remove rear turn indicators.

Position over rear fender. Using bolts and washers provided, install at the original rear fender loop bracket mount position. Do not tighten at this time.

Re install the rear turn indicator in original position over the rack mount.

Tighten all hardware

Re tighten all hardware after 100 miles.

Use your own judgment when loading your motorcycle.

Limits may depend on rider experience, speed, terrain to be covered and weather conditions.
