

WINCH MOUNT INSTALLATION INSTRUCTIONS
CAN-AM DEFENDER WINCH MOUNT
PART# 4505-0698

PART#	QTY.	DESCRIPTION
1627-1	1	Winch Mount Plate
HDW9412	4	5/8 x 1/4 Spacer
HDW2051	4	5/16 x 1 Hex Bolt
HDW7058	4	5/16 Nylock Nut
INST1627	1	Instruction Sheet

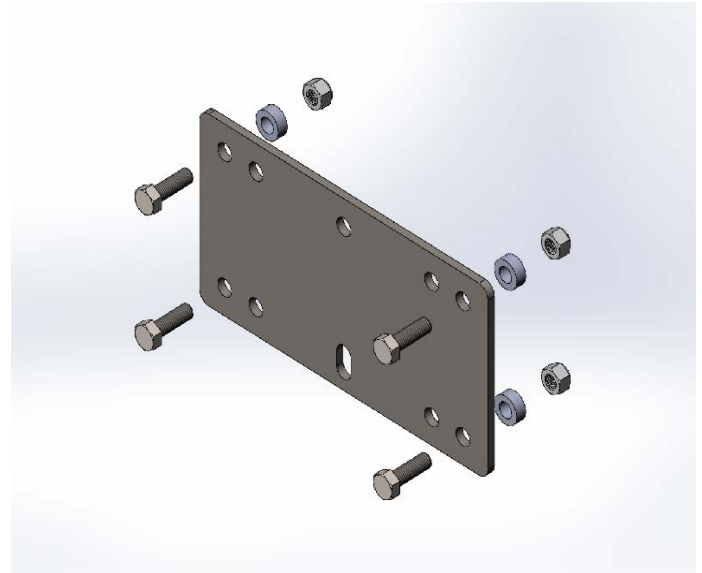

NOTE: This winch mount is for smaller winches. The larger 4000# - 4500# winches with 6" bolt pattern will automatically bolt up to the machine. The smaller winches with the four 7/8" bolt pattern will require this winch mount plate.

First, attach winch to the winch plate using hardware provided with winch. Depending on the winch, you may have to place winch mount bolts in place before attaching the winch.

After bolting winch to plate, you can attach the winch with plate to the machine with the 5/16" x 1" hex bolts. (The winch mount plate will line up with holes in the vertical frame tubes.)

Use the spacer between the frame tubes and the winch mount plate for bolt head clearance on the winch bolts.

Place nylock nuts on the back side and tighten securely. (The bolt pattern in the middle is for the smaller two bolt pattern style winches.)

FOR QUESTIONS OR COMMENTS PLEASE CALL: 320-964-1616 (7:00 to 4:30 CST Monday through Thursday).
