Product Name: Chain Wax Supplier: Maxima Racing Oils **Article Number:** 74920

9266 Abraham Way **Generic Chemical Name:** Aerosol Santee, CA 92071 **Applications:** Chain Lubricant

USA

+1 619 449 5000 Emergency Telephone: CHEMTREC +1 703 527 3887 (24 hours)

2. HAZARDS IDENTIFICATION

GHS Classification

Flammable Aerosol Category 1 Gas Under Pressure **Liquefied Gas** Aspiration Toxicity Category 1 Skin Irritation Category 2 Skin Sensitization Category 1

Eye Irritant Category 2A Reproductive Toxicity Category 2

Specific Target Organ Category 3 (Nervous Toxicity Single Exposure system effects)

Specific Target Organ **Toxicity Repeat Exposure**

Category 2

Note: This product is a consumer product and is labeled in accordance with the US Consumer Product Safety Commission regulations which take precedence over OSHA Hazard Communication labeling. The actual container label will not include the label elements below. The labeling below applies to industrial/professional products.

Label Elements:

GHS Pictogram

Signal Word DANGER!

Hazard Statements Extremely Flammable Aerosol.

Contains gas under pressure; may explode if heated.

May be fatal if swallowed and enters airways.

Causes skin irritation.

May cause an allergic skin reaction. Causes serious eye irritation.

Version: 1.1

Released: 2015-06-01 Revision Date: 2015-05-28

May cause drowsiness or dizziness.

Suspected of damaging fertility or the unborn child.

May cause damage to nervous system through prolonged or repeated

exposure.

Precautionary Statements

Prevention Obtain special instructions before use.

Do not handle until all safety precautions have been read and understood. Keep away from heat, sparks, open flames, hot surfaces – No smoking.

Do not spray on an open flame or other ignition source. Pressurized container: Do not pierce or burn, even after use.

Do not breathe vapors or mists.

Contaminated work clothing should not be allowed out of the workplace.

Wash thoroughly with soap and water after handling.

Use only outdoors or in a well-ventilated area. Wear protective gloves and eye protection.

Response IF SWALLOWED: Immediately call a POISON CENTER or physician. Do NOT

induce vomiting.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists:

Get medical advice/attention.

IF ON SKIN: Wash with plenty of soap and water. If skin irritation or rash occurs: Get medical attention. Take off contaminated clothing and wash

before reuse.

IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or physician if you feel

unwell.

IF exposed or concerned: Get medical advice.

Storage Store locked up.

Protect from sunlight. Do not expose to temperatures exceeding

50°C/122°F. Store in a well-ventilated place.

Disposal Dispose of contents and container in accordance with local and national

regulations.

Other Hazards None

4. FIRST-AID MEASURES

Inhalation If irritation is experienced, move to fresh air. Get medical attention if irritation

or other symptoms develop and persist.

Skin Contact Wash with soap and water for several minutes. Remove contaminated

clothing and wash before reuse. If irritation develops and persists, get medical

attention.

Eye Contact Immediately flush eyes with plenty of water for at least 15 minutes, lifting

upper and lower eyelids occasionally. Get medical attention if irritation

persists

Ingestion Aspiration Hazard. DO NOT induce vomiting. Call physician or poison control

center.

Most ImportantMay cause eye and skin irritation. May cause skin sensitization. InhalationSymptomsmay cause drowsiness, dizziness and other nervous system effects. Harmful or

Version: 1.1

Released: 2015-06-01 Revision Date: 2015-05-28

fatal if swallowed. Aspiration of liquid into the lungs during swallowing or vomiting may cause lung damage. N-Hexane exposure can cause peripheral neuropathies. Initial symptoms include numbness in the extremities. Motor weakness may also occur. Prolonged exposure may cause reproductive harm

and may damage the nervous system.

Indication of Immediate Medical Immediate medical attention is needed for ingestion.

Attention Needed Notes to Physician

Notes to Physician Treat appropriately.

5. FIRE FIGHTING MEASURES

Suitable Extinguishing

Media

Use water fog, dry chemical, carbon dioxide or foam. Do not use water jet or flooding amounts of water. Burning product will float on the surface and

spread fire.

Specific Hazards
Arising From The
Chemical

Extremely flammable aerosol. Highly flammable liquid and vapor. Contents under pressure. Keep away from ignition source and open fire. Exposure of containers to extreme heat and flames can cause them to rupture often with violent force. Vapors can cause a flash fire. Vapors are heavier than air and may travel along surfaces to remote ignition sources and flash back. A vapor and air mixture can create an explosion hazard in confined spaces.

Combustion will produce oxides of carbon, saturated and unsaturated

hydrocarbons.

Special Protective Equipment And Precautions For FireFirefighters should always wear positive pressure self-contained breathing apparatus and full protective clothing. Cool fire-exposed containers with

water. Use shielding to protect against bursting containers.

Fighters

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions Wear appropriate protective clothing (see Section 8). Eliminate all sources of

ignition and ventilate area

Environmental Hazards

Methods/Materials for

Cleaning up

Not determined

Leaking cans should be placed in a plastic bag or open pail until the pressure has dissipated. Contain and collect liquid with an inert absorbent and place in

a container for disposal. Clean spill area thoroughly. Report spills to

authorities as required.

7. HANDLING AND STORAGE

Precautions for Safe Handling:

Avoid contact with eyes and skin. Avoid breathing vapors or aerosols. Use only with adequate ventilation. Keep away from heat, sparks, pilot lights,

Version: 1.1

Released: 2015-06-01 Revision Date: 2015-05-28

> hot surfaces and open flames. Unplug electrical tools, motors and appliances before spraying or bringing the can near any source of

electricity. Electricity can burn a hole in the can and cause contents to burst into flames. To avoid serious burn injury, do not let the can touch battery terminals, electrical connections on motors or appliances or any other source of electricity. Wash thoroughly with soap and water after handling. Keep containers closed when not in use. Keep out of the reach of children.

Do not puncture, crush or incinerate containers, even when empty.

Conditions for Safe

Storage

Store in a cool, well-ventilated area, away from incompatible materials. Do

not store above 120°F or in direct sunlight. U.F.C (NFPA 30B) Level 3

Aerosol. Store away from oxidizers.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Additive None Established

The Following Controls are Recommended for Normal Consumer Use of this Product

Appropriate Use in a well-ventilated area.

refined

Engineering Controls Personal Protection

> Respiratory None needed for normal use with adequate ventilation.

Protection:

Eve Protection: Avoid eye contact. Always spray away from your face.

Skin/Body Protection: Avoid prolonged skin contact. Chemical resistant gloves recommended for

operations where skin contact is likely.

Version: 1.1

Released: 2015-06-01 Revision Date: 2015-05-28

For Bulk Processing or Workplace Use the Following Controls are Recommended

Use adequate general and local exhaust ventilation to maintain exposure **Appropriate**

Engineering Controls levels below that occupational exposure limits.

Personal Protection

Respiratory None required if ventilation is adequate. If the occupational exposure limits are exceeded, wear a NIOSH approved respirator. Respirator selection and **Protection:** use should be based on contaminant type, form and concentration. Follow

OSHA 1910.134, ANSI Z88.2 and good Industrial Hygiene practice.

Eye Protection: Safety goggles recommended where eye contact is possible.

Skin/Body Protection: Wear chemical resistant gloves.

> Work/Hygiene Wash with soap and water after handling.

10. STABILITY AND REACTIVITY

Reactivity Not reactive under normal conditions

Chemical Stability Stable.

Possibility of Hazardous Acetone reacts violently with chloroform in the presence of bases.

Reactions

Conditions to Avoid Avoid heat, sparks, flames and other sources of ignition. Do not puncture or

incinerate containers.

Incompatible Materials Strong oxidizers, acids, peroxides, and reducing agents.

Hazardous Decomposition Product Thermal decomposition will generate oxides of carbon, saturated

and unsaturated hydrocarbons.

11. TOXICOLOGICAL INFORMATION

Potential Health Hazards

Eye Contact: Contact may be irritating to eyes. May cause redness, stinging, swelling and tearing **Skin Contact:** May cause skin irritation with short-term exposure with redness, itching and burning of the skin. Prolonged and/or repeated contact may produce defatting and possible dermatitis. May cause an allergic skin reaction (sensitization).

Inhalation: Mist or vapor can irritate the throat and lungs. High concentrations may cause nasal and respiratory irritation and central nervous system effects such as headache, dizziness and nausea. Intentional abuse may be harmful or fatal.

Ingestion: Swallowing may cause gastrointestinal irritation, nausea, vomiting and diarrhea. The liquid contents are an aspiration hazard. If swallowed, can enter the lungs and may cause chemical pneumonitis

Chronic Effects: Prolonged overexposure may cause nervous system damage. n-Hexane exposure can cause peripheral neuropathies. Initial symptoms include numbness in the extremities. Motor weakness may also occur.

Carcinogen Status: None of the components are listed as a carcinogen or suspect carcinogen by IARC, NTP, ACGIH or OSHA.

Reproductive Toxicity: Prolonged exposure to n-hexane has resulted in decreased sperm count and degenerative changes in the testes of rats but not mice

Numerical Measures of Toxicity: n-Hexane: Oral rat LD50: 16,000 mg/kg, Inhalation rat LC50: >31.86 mg/L/4hr, Dermal rabbit LD50: >2,000 mg/kg

Acetone: Oral rat LD50: 5,800 mg/kg, Inhalation rat LC50: 120 mg/L, Dermal rabbit LD50: 20,000 mg/kg

Liquefied Petroleum Gas: No toxicity data is available

Residual oils, petroleum, solvent refined: Oral rat LD50: >5,000 mg/kg, Inhalation rat LC50: 2.18

mg/L/4hr, Dermal rabbit LD50: >2,000 mg/kg Stoddard Solvent: No toxicity data is available

12. ECOLOGICAL INFORMATION

Ecotoxicity

n-Hexane: 96 hr LC50 Fathead minnow- 2.5 mg/L, 48 hr EC50 Daphna magna-

2.1 mg/L, 72 hr EbL50 Green algae- 26 mg/L

This product is expected to be harmful to the aquatic environment with long-term adverse effects. Releases to the environment should be avoided.

Biodegradation n-Hexane: Readily biodegradable-83% in 28 days. Additive: Not readily

biodegradable- 45% in 28 days.

Bioaccumulation There is a potential for bioaccumulation.

Mobility in soil No data available.

Other adverse effects: None known.

13. DISPOSAL CONSIDERATIONS

Disposal If this product becomes a waste, it would be expected to meet the criteria

of a RCRA ignitable hazardous waste (D001). However, it is the responsibility

of the generator to determine at the time of disposal the proper classification and method of disposal. Do not puncture or incinerate

containers, even empty. Dispose in accordance with federal, state, and local

regulations.

14. TRANSPORT INFORMATION

	UN Number	Proper shipping name	Hazard Class	Packing Group	Environmental Hazard
DOT	UN1950	Aerosols	2.1		
IMDG	UN1950	Aerosols	2.1	LTD QTY	Marine Pollutant (Hexane)
ICAO	UN1950	Aerosols, flammable	2.1		

Special precautions: None known.

15. REGULATORY INFORMATION

CERCLA: Releases of this product in excess of the reportable quantity of 16,666 pounds based on the RI for n-hexane of 5,000 lbs present at less than 30% must be reported to the National Response Center. Many states have more stringent release reporting requirements. Report spills required under federal,
