

THE BRAND OF CHAMPIONS.

Since 1968, THOR has been driven by an unrelenting passion for racing. In 2021, our elite team of Supercross professionals did not waver from this mindset and brought forth legendary performances resulting in a clean THOR sweep of the 450, 250 East and 250 West Supercross championships.

At the series finale, Cooper Webb had closed out his second 450 title, while Colt Nichols and Justin Cooper put their respective stamps in the 250 class record books. Emotions ran high, emphasizing that a season of hard work and determination had paid off. In racing, our senses are pushed to the limit; whether the tactile connection that THOR products give our riders to perform at their best, or the overwhelming sense of relief and pride that comes with realizing a lifelong championship dream. This is THOR. This is *The Feel of Moto*.

ADVANCED BREATHABILITY AND COOLING
Air flows consistently through the open-cells, whilst hot air from your head can easily escape, ensuring more efficient cooling in the most intense conditions.

PROTECTION NEVER FELT SO LIGHT
This design features the world's thinnest walled tubes to achieve a structure which is 95% air, reducing weight and enhancing comfort without compromising on safety.

MIPS® SAFETY SYSTEM (AVAILABLE ON REFLEX AND SECTOR MIPS®)

MIPS® SAFETY FOR HELMETS
The Mips® Safety System allows the head to move inside the helmet which can reduce the harmful rotational force otherwise transferred to the head.

LOW FRICTION LAYER
The Mips® Safety System features a low-friction layer inside a motocross helmet that allows a multi-directional movement of 10-15mm on certain angled impacts, intended to help reduce rotational force to the head.

ADDITIONAL KEY FEATURES

MAXIMUM AIRFLOW
Our helmets offer strategically placed intake vents and multiple exhaust vents designed to accelerate the airflow in a precise and effective manner.

ANTI-MICROBIAL
Removable, washable, moisture wicking, anti-microbial DRYFORM comfort liner.

CHOOSING THE CORRECT HELMET SIZE: Helmet fit is critical to helmet protective performance. The correct helmet size can only be checked and confirmed by physically fitting the helmet to the user. Always try the helmet on in a store, before purchasing it, to be sure you are purchasing the correct sized helmet for you.

HELMET SIZING INFORMATION: To achieve proper helmet fitment, begin by finding your head circumference size using the method described. Remember that the helmet size you choose should fit around the crown of your head comfortably with no pressure points. The cheekpads should fit firmly around your face. Once your chin strap is fastened, grab the chin bar of the helmet and move it side to side. Your cheeks should move with the helmet, which should not slide across your face. Different thickness cheekpads can be purchased to obtain the best fit. Ask your dealer or visit www.thormx.com for more information.
